Math, Science/Technology, History/Social Science and associated testing known as MCAS. Or take any other action in relation thereto.

"WHEREAS: The Commonwealth of Massachusetts has had the highest educational standards in the country for decades because of effective policy handled by local school boards with input from parents; and

WHEREAS: Education is most effectively handled at the local level, where parents can have direct control over school curriculum and policy; and

WHEREAS: The federal government's takeover of education, known as "Common Core", threatens parental control over their children's education"¹ as noted below:

"The Common Core State Standards Initiative (CCSSI) is a set of national K-12 standards developed primarily by a nonprofit called Achieve, Inc., in Washington, D.C. under the auspices of the National Governors Association (NGA) and the Council of Chief State School Officers (CCSSO). The Common Core was developed without state legislative authority."²

By linking Race-to-the-Top grant funds to the implementation of Common Core State Standards "and linking the Common Core to No Child Left Behind waivers, the federal government is acting as the "enforcer" to herd states into the "one-size-fits- all" Common Core in spite of the fact that three federal laws"² (*The Department of Education Organizational Act, established in 1979, Section 103b; The General Education Provisions Act; and The Elementary and Secondary Act, first enacted in 1965*) "prohibit the federal government from guiding the educational curriculum of the states. Not only the U.S. Constitution, but also state constitutions maintain that education is a power reserved to the states and their citizens. Yet, state legislatures or state school boards cannot change the Common Core."²

"Taxpayers pay hundreds of billions in state and local taxes per year for K-12 education. Yet, the Common Core guarantees taxpayers and parents NO VOICE in math and English content standards of their states and thus no control over what children will learn in these subjects. In fact, most states agreed to implement the Common Core before the standards were even released, all without state legislative approval or even public hearings."²

"The Common Core ensures that the states build expensive high-tech systems that will track student performance and other personal data and provide that information to the federal government. The unfunded mandates associated with the Common Core are open-ended in areas such as professional

development, new textbooks and instructional materials, testing, and data-tracking systems. A recent study shows implementation will cost \$16 billion or more nationwide, with about 90 percent of this paid for by states and local districts, despite the \$4.35 billion Race to the Top grants. The Common Core fuels a money pot of tax dollars going to pre-selected vendors.”²

THEREFORE: We reject the use of the Common Core State Standards and the associated testing known as PARCC (Partnership of Assessment of Readiness for College and Careers) which stifles academic freedom and achievement, and return control over education to the local school district of Whitman and Hanson, Massachusetts. We choose to use the Pre 2009 Massachusetts standards in ELA, Math, Science/Technology, and History/Social Science and associated testing, known as MCAS, which has made Massachusetts' education number one in the nation, and competitive with the top ranking countries on international standardized tests.
