

# Rules and Regulations

## Please respect the land & enjoy your walk!

- Properties are open from dawn through dusk.
- No motorized vehicles (except those that qualify with all ADA requirements) are allowed on any conservation/open space parcel other than within parking areas. This includes cars, trucks, recreational vehicles (RV), all terrain vehicles (ATV), motorcycles, dirt bikes, scooters, or any other vehicle that has a motor or engine.
- Plant materials, vegetation, cuttings, soils, etc., shall not be removed for any reason.
- All trash and other materials brought into a site must be removed at the conclusion of an event.
- No dumping of materials or infringement into protected wetlands.
- No overnight camping or parking.
- No open fires.
- No alcohol or drugs.
- Please stay on the trails.
- DO NOT DISTURB or FEED the wildlife. These areas serve not only as living and traveling areas for animals and insect wildlife, but also where natural vegetation grows for their food and protection.
- In the event of any emergency, please contact local emergency services by dialing 911.

**PLEASE NOTE:** Due to historic mercury contamination upstream, no species caught in the Indian Head River should be eaten. Check current regulations prior to fishing in the Indian Head River.

# About the Indian Head River Trail Coalition

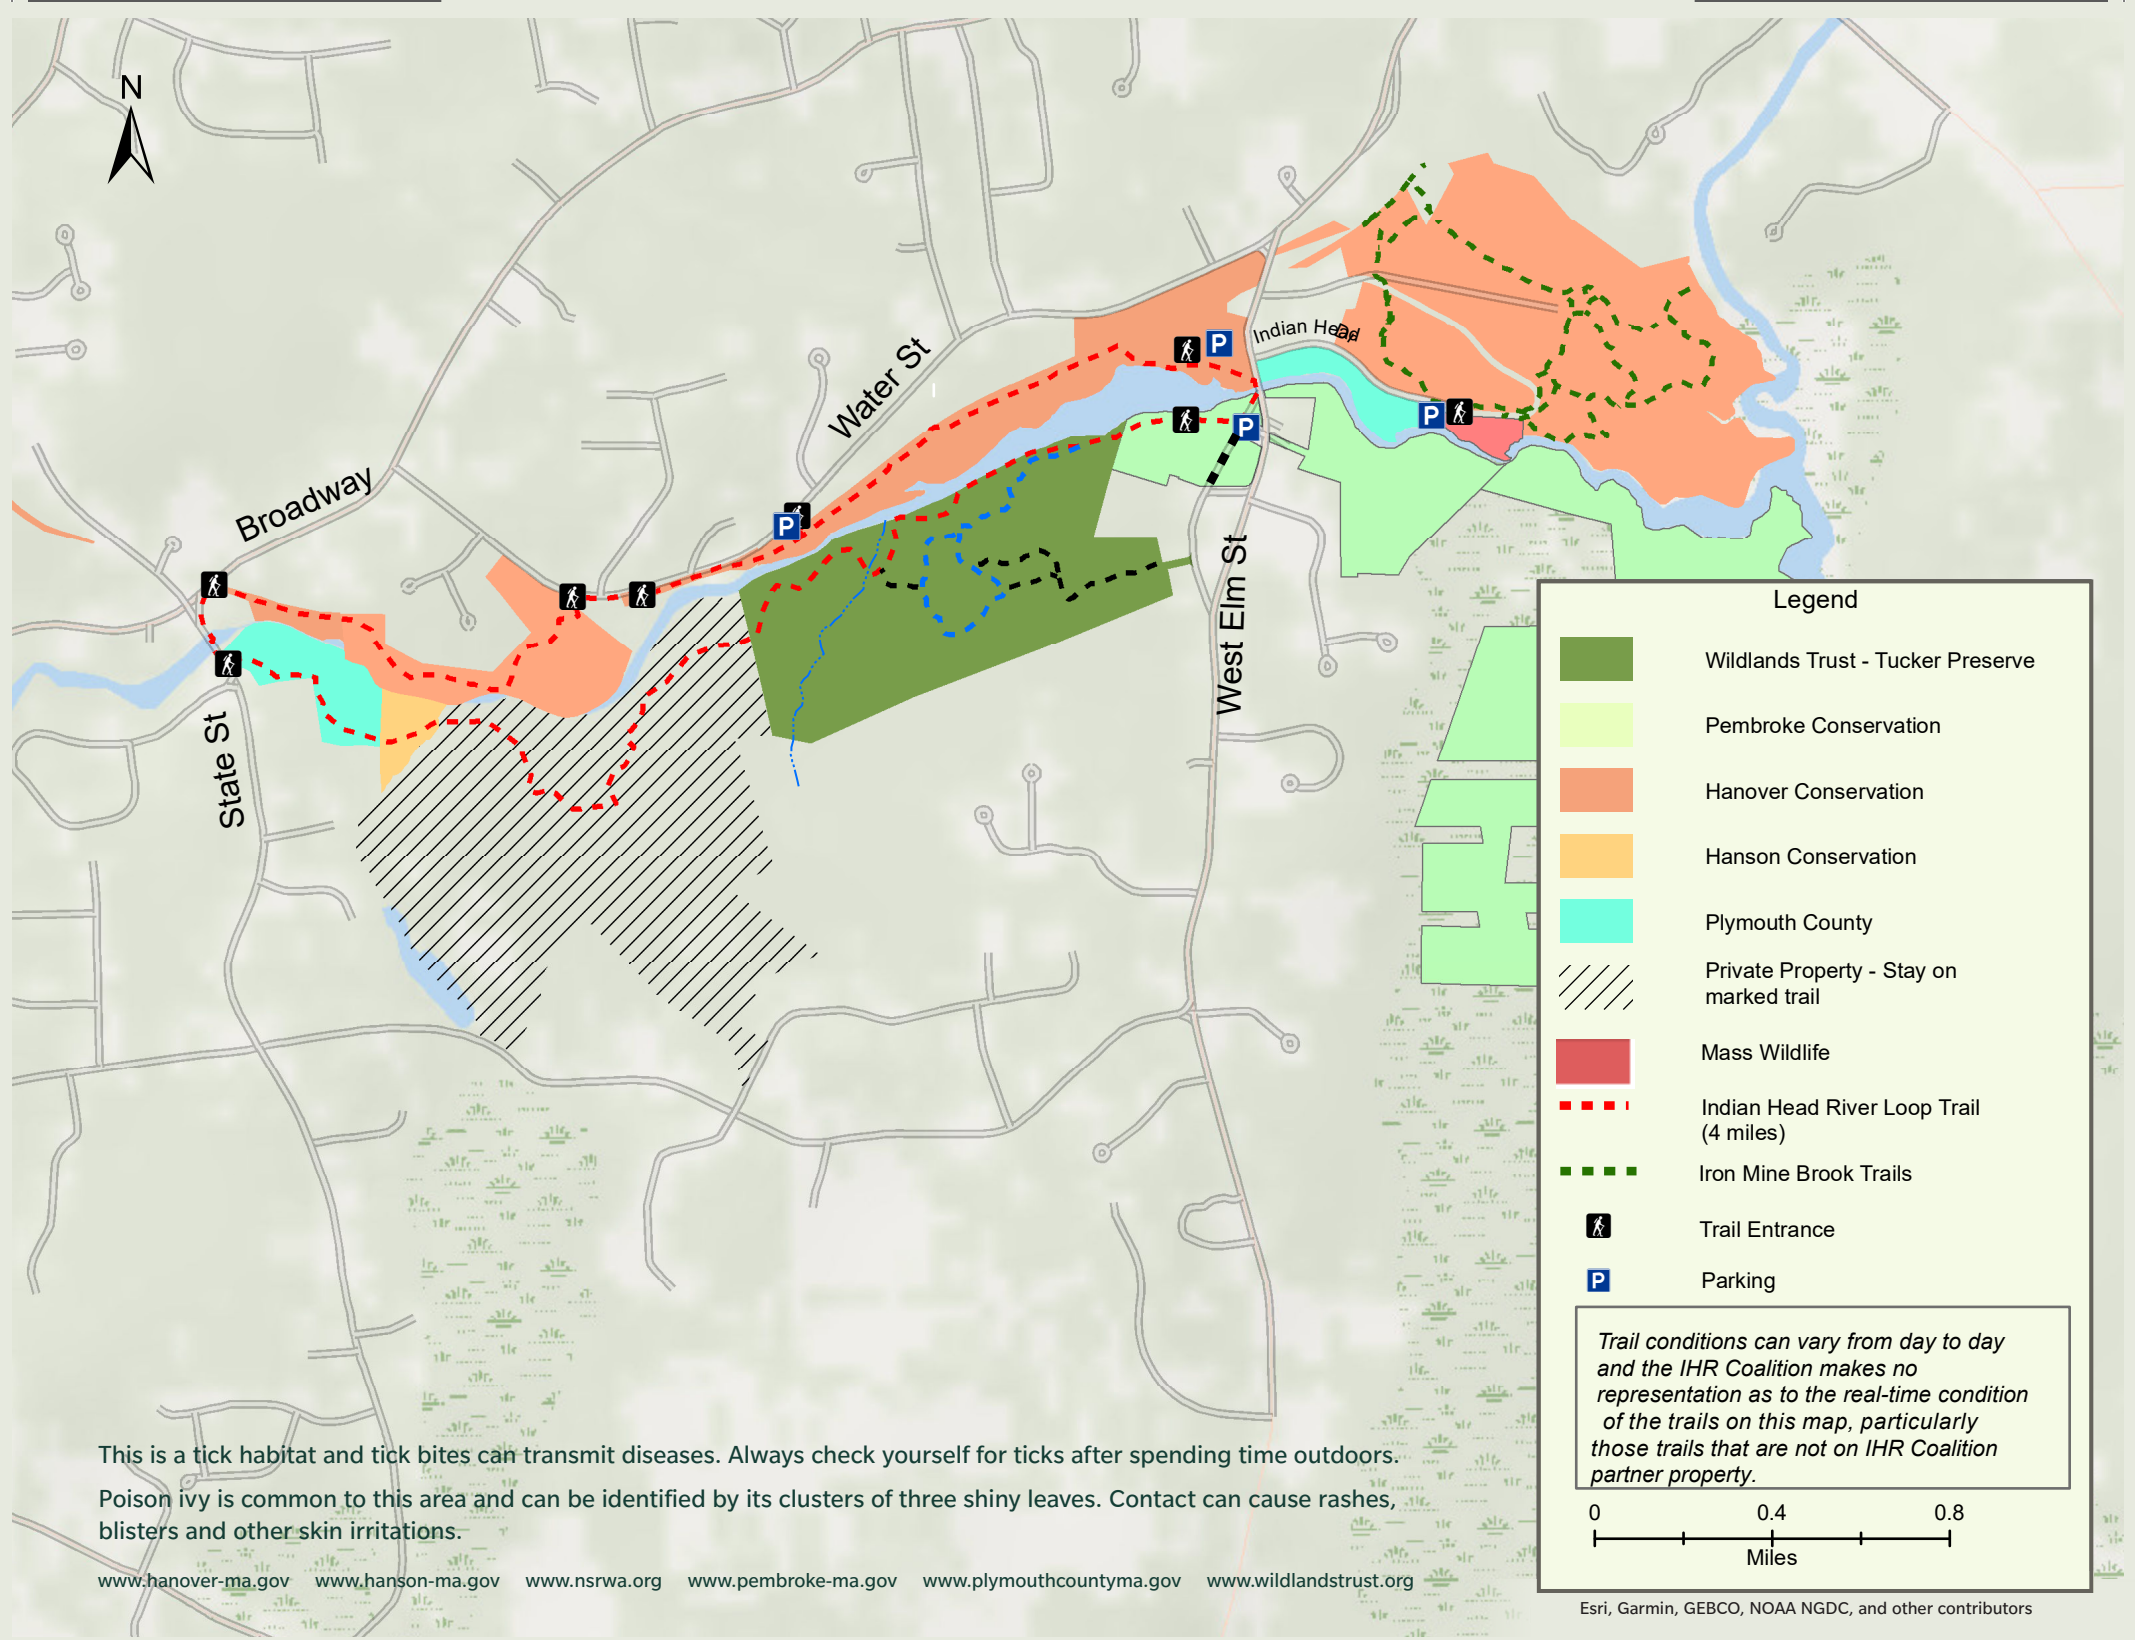

The Indian Head River Coalition was created in 2017 for the purpose of preserving the historic and natural qualities of the contiguous conservation lands along the Indian Head River and engage the general public in taking advantage of passive recreational opportunities on these properties. The Coalition is composed of Wildlands Trust, the North and South Rivers Watershed Association, Plymouth County and the towns of Hanover, Hanson and Pembroke. In 2018, the group obtained a Recreational Trails Program (RTP) grant to provide trail maintenance, trail markings, amenity improvements, and new kiosks and interpretive signage along the 6-mile trail corridor that connects each property.

This is a tick habitat and tick bites can transmit diseases. Always check yourself for ticks after spending time outdoors.  
 Poison ivy is common to this area and can be identified by its clusters of three shiny leaves. Contact can cause rashes, blisters and other skin irritations.
